

ENERGY INDUSTRY LITIGATION SUPPORT SERVICES

Celerity's Litigation Support team helps energy organizations optimize matters across all phases of litigation

ENERGY INDUSTRY LITIGATION SUPPORT

ENERGY INDUSTRY LITIGATION SUPPORT ACUMEN

Celerity's Litigation Support division provides energy organizations with eDiscovery, data analysis, expert witness and incidence response services to help maximize legal matters and mitigate risk. From energy exploration and production to distribution, movement and usage of oil, gas and electricity, Celerity's Litigation Support team helps energy organizations optimize matters across all phases of litigation.

EDISCOVERY SERVICES

Celerity's integrated eDiscovery services for energy companies encompass a comprehensive suite designed to navigate every stage of the legal discovery process.

- **Digital Forensics** – certified forensic examiners (i.e., EnCase, Cellebrite, etc.) to collect, analyze and identify lost, hidden or deleted data from computers, mobile devices, cell phones, hard drives, storage devices, cloud and social data
- **Identification** - integrated data mapping, search term analysis, legal holds and evidence tracking expertise to prepare for litigation
- **Interviewing** - interview, summarize and inventory custodian data / documentation via site visits, telephone calls and online surveys
- **Preservation and Collection** - identify, capture, collect and preserve data in a defensible manner to support matters across disciplines
- **Remote and Cloud Collection** - collect from laptops, desktops, mobile devices and cloud data sources without the need to be on-site
- **Data Filtering and Culling** - tools and expertise to cull, obtain and expedite better visibility to reduce data volumes, timelines and costs
- **Processing** - process data to extract information for deeper analysis, review, filtering and mining of datasets, records coding and databases
- **Review Analytics** - technology assisted review / active learning and clustering workflows to prioritize and optimize investigations and reviews
- **Document Services** - efficient, scalable, tactical support for legacy paper discovery requests conducted in-hours and offshores
- **Hosting** - cloud-based data hosting via Relativity review platform with self-administration functions to enable clients to manage matters
- **Document Review** - remote or onsite talent, technology and processes to help clients identify and use responsive data in a defensible fashion
- **Document Production** - project management, quality control and redaction assistance to minimize conflicts and errors prior to production

DATA ANALYSIS SERVICES

Celerity works with large, diverse data sets to provide precision, defensible answers to legal matters.

- **Structured Data Analysis** - data cleansing, validation, normalization and examination of querying, code writing and reporting
- **Reporting** - footnoted reports documenting sources, methodologies and assumptions supported with heat maps and interactive charts
- **Database Development** - structured, concise and sound databases developed from diverse data sources with focus on the back-end analysis
- **GIS and Asset Management** – experienced in extracting, analyzing and presenting data from GIS and asset management databases in clear formats

EXPERT WITNESS SERVICES

Celerity Expert Witness professionals are respected industry leaders that provide written live expert witness services, opinions, declarations, affidavits to support energy organizations throughout the legal process.

- **Expert Witness Reports** - research, preparation, production and presentation of precision expert, reply and rebuttal reports and exhibitions
- **Live Expert Testimony** - data analysis / eDiscovery subject matter expert testimony to federal / state courts, grand juries and public utility commissions
- **Opposing Witnesses Rebuttals** - examination of witness testimony to identify misrepresentations, false equivalencies non-sequiturs and omissions

INCIDENT RESPONSE SERVICES

When an energy incident occurs, Celerity leverages our experienced teams, established methodologies and full suite of litigation support services to help our clients strategically and tactically respond. Celerity works to protect the company by managing and optimizing risks to the company during the response and in the regulatory investigations and litigation that follow.

COMPLEX ENERGY DATA ACUMEN

- **EAM Databases (SAP/Maximo)** - systematic data gathering relative to the condition, performance and integrity of critical infrastructure to ensure reliability, safety and compliance of energy assets. Fueled by comprehensive design methodologies, powerful deployment tools and streamlined processes, Celerity obtains, organizes and analyzes complex data to ensure accurate, relevant and timely intelligence to aid in making better informed case strategy decisions.
- **GIS and SCADA Systems Acuity** – deep experience gathering, validating and monitoring spatial data to ensure GIS database accuracy to empower intelligent decision making for energy clients and outside counsel
- **Extensive Expertise** – powerful hands-on blend of energy client and vendor-side experience

ABOUT CELERITY

Celerity is an agile risk optimization company that helps energy organizations convert complex data into clear, actionable intelligence to mitigate risk, optimize assets and maximize project results.

Blending extensive client experience with deep vendor-side acumen, Celerity energy engineers orchestrate precision data analysis, strategic consulting and project management services to solve complex energy challenges via acute listening, proactive thinking and relentless grit.

Based in Walnut Creek, CA with remote offices nationwide, Celerity energy engineers perform a critical, leadership role as strategic liaison between data, assets and the teams that make projects happen in the field.
