

CONVERTING RAW DATA INTO INTELLIGENCE WELL-DONE

Strategic consulting, data science and project management services to help utility organizations mitigate risk, optimize assets and maximize project results

CELERITY CONSULTING SERVICES

UTILITIES INDUSTRY CONSULTING EXPERTISE

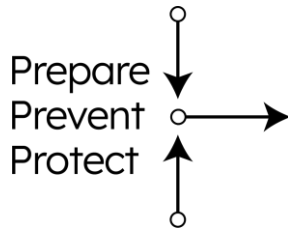

Celerity is an agile risk optimization company that helps public utility organizations convert complex data into precision, actionable intelligence to mitigate risk, optimize assets and maximize project results.

Blending extensive client experience with deep vendor-side acumen, Celerity data scientists orchestrate precision data analysis, strategic consulting and project management services to solve complex energy challenges via acute listening, proactive thinking and relentless grit.

Based in Walnut Creek, CA with remote offices nationwide, Celerity energy engineers perform a critical, leadership role as strategic liaisons between data, assets and the teams that make projects happen in the field.

PREPARE | PREVENT | PROTECT

Segmented into (3) core, integrated disciplines, Celerity Consulting Services help public utility clients prepare for the inevitable, prevent recurring incidents and protect people and assets from danger.

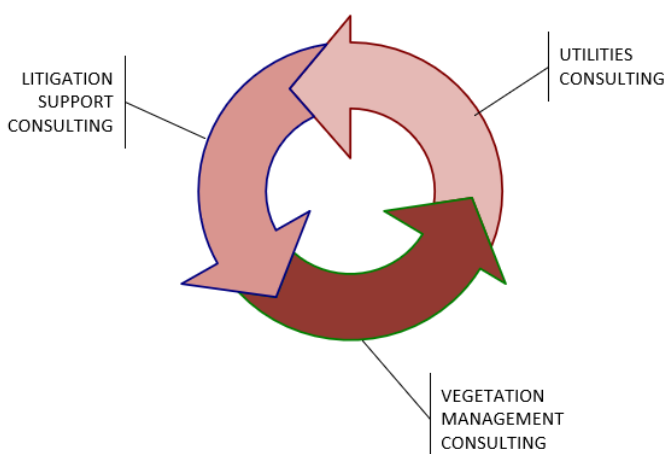

- **Prepare** for incidents before they happen via deep data analysis, strategic planning and hands-on execution to anticipate and mitigate risk
- **Prevent** incidents from recurring by optimizing data, strategies and intelligence through diligent planning to optimize risk prevention initiatives
- **Protect** their assets, people and environment from short and long-term risk post-incident to minimize impact and optimize recovery

INTEGRATED CONSULTING SERVICES

Celerity's integrated consulting services provide clients with a broad spectrum of advanced strategic consulting, project management and technical expertise to help clients optimize projects onsite and online.

From electric and gas utility consulting to vegetation management services, litigation support expertise and beyond, Celerity's potent mix of hands-on services help convert raw data into intelligence well-done, in turn empowering clients with the information they need to optimize projects from inception to completion.
